# TPMS90 Diagnostic Tool

TPMS90 is a professional TPMS diagnostic and service tool which can activate/decode universal TPMS sensors, program the CGSULIT TS01 TPMS sensor and diagnose the vehicle tire pressure monitor system problems. TPMS90 together with sensor TS01 are the best solution for busy tire and automotive workshops that require a professional tool for TPMS service.

## Description

- 1- Basic OBDII code reader, support all 10 test modes of the latest J1979 OBDII test.
- 2- Specification and enhanced OBDII Mode 6.
- 3- Read universal TPMS sensor data, activate and program CGSULIT TPMS sensor TS01.
- 4- Diagnose the vehicle TPMS system, read/clear TPMS DTCs, live data.
- 5- Scan universal TPMS sensor ID and copy ID into TS01.
- 6- Manual input OE ID into TS01 sensor.
- 7- Program TS01 by auto creating sensor ID.
- 8- Read Sensor ID by OBD and copy ID into TS01.
- 9- Relearn by OBD function.
- 10- Relearn procedure guide on the tool.
- 11- Check Key FOB.

## Specifications

Display	2.8" TFT color display
Power Supply	3.7V Li-polymer battery
Working Temperature	0° to 55° C (32° to 131° F)
Storage Temperature	-20° to 70° C (-4° to 158° F)
Product Dimension	335*229*82 MM
Weight	1.37KG

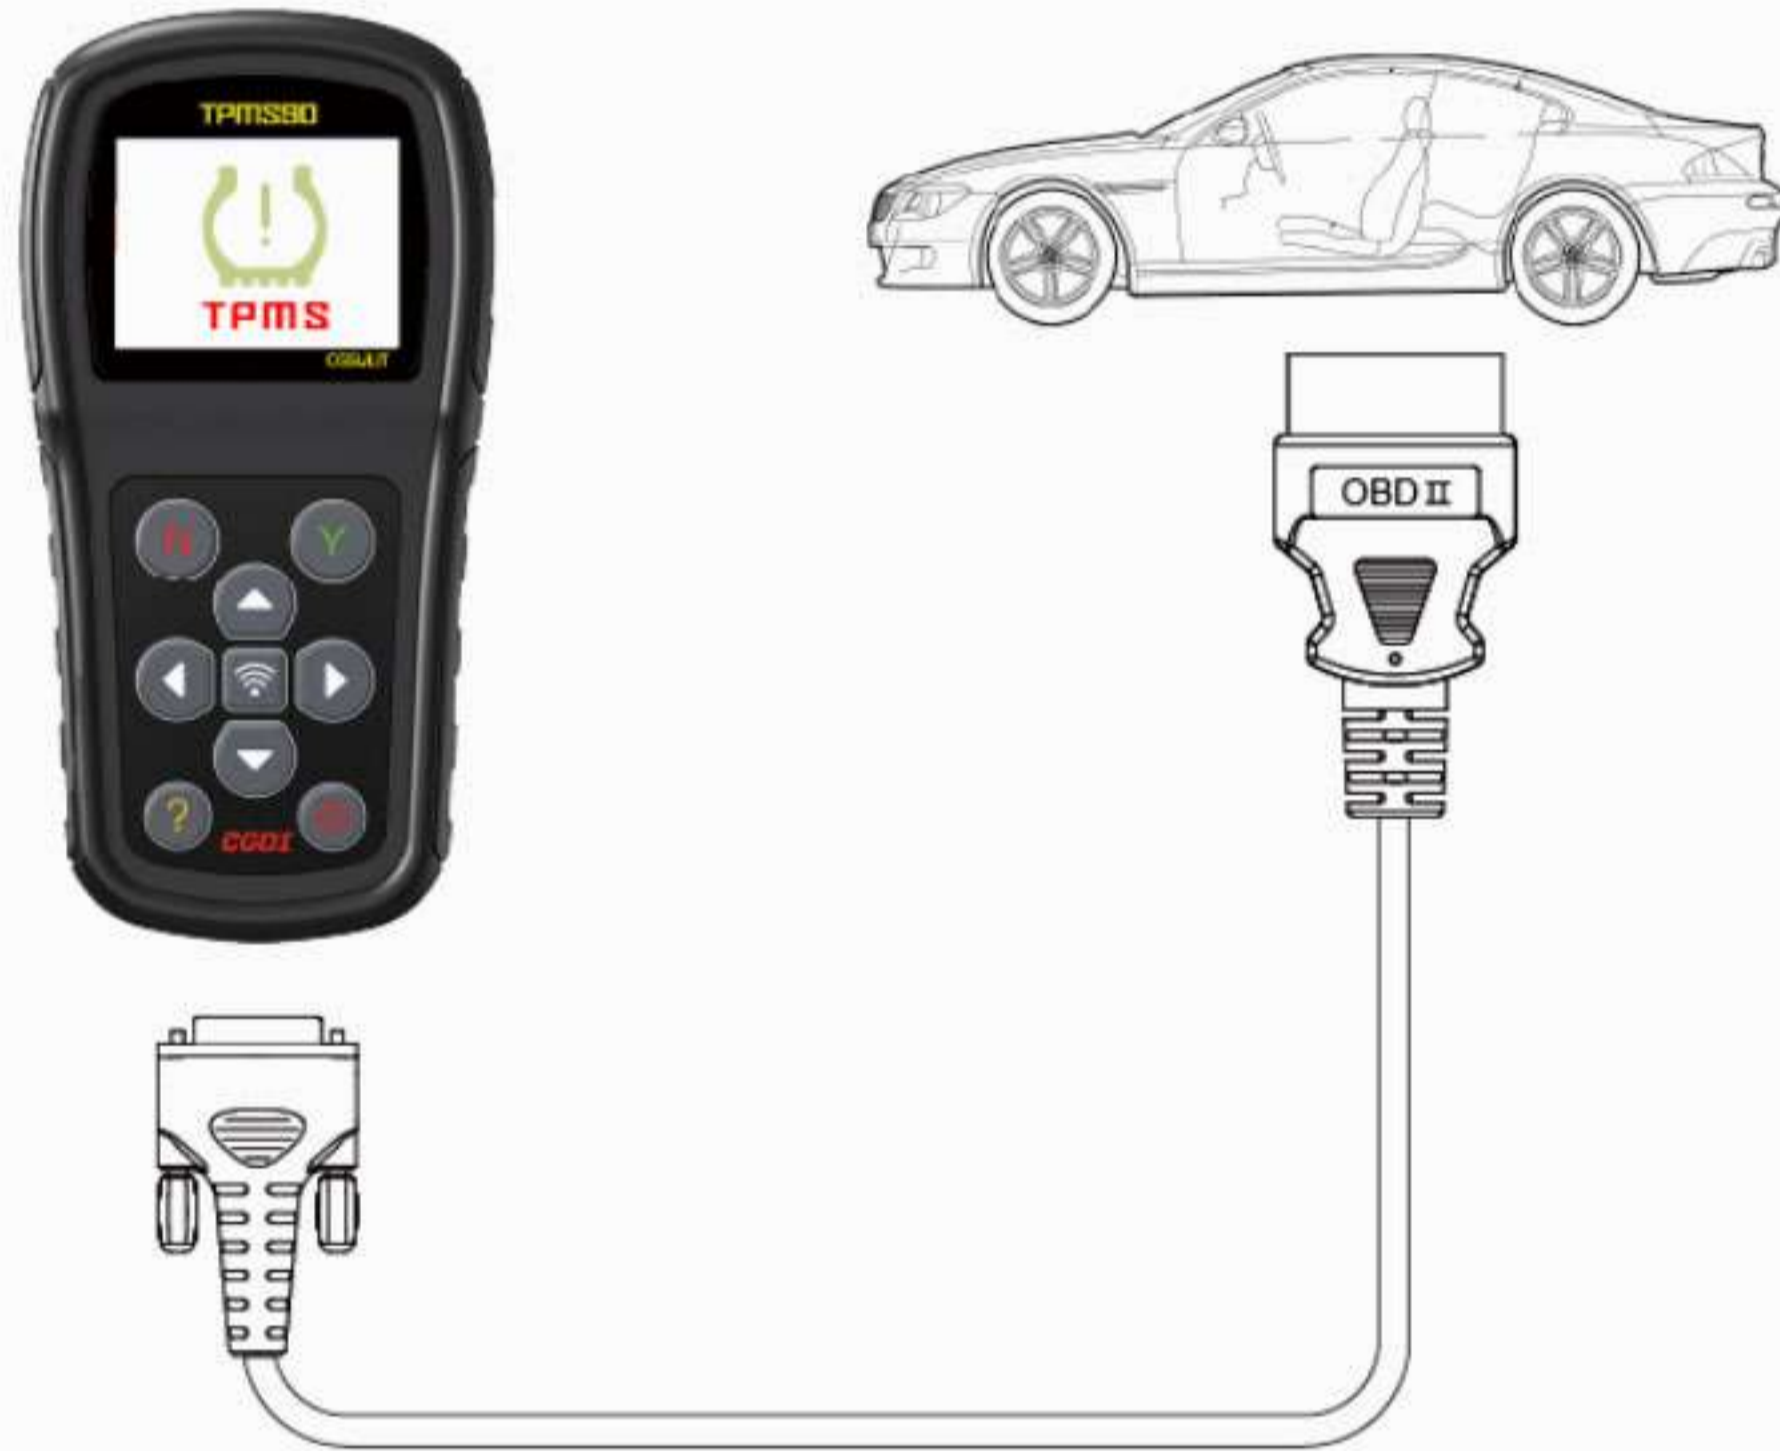

Welcome to use TPMS90. This tool is easy to operate and durable. You only need to use it according to the instructions and perform proper maintenance.

## 1. Description

- ① DB15 Port- OBD II Connector
- ② Rubber Protector
- ③ Features Buttons
- ④ 2.8 "color display
- ⑤ TPMS low frequency antenna (Low frequency detection area)
- ⑥ USB TypeC interface

## 2. Operation Instruction

Turn off the ignition switch and connect TPMS90 to the vehicle diagnostic port through the OBD connector. You can perform operations such as sensor ID reading and writing.

The sensor is placed in the TPMS detection area, the device is opened to select the corresponding vehicle type, and the sensor can be burned, identified, copied and other operations.

## 3. Update Instruction

**Tip: Make sure the TPMS90 device is connected to the Internet and has enough power or is connected to a power source.**

Select [My Device]-[Update by WIFI], and after successfully connecting to WIFI according to the prompt, you can automatically Update with one click.

Select [My Device]-[Update by USB], connect the device to the PC via a USB cable, open the PC Update software and Update according to the operating instructions.

**Tip: You can query the testable models of the latest version of the software through the PC Update software-[Testable Models].**

Please contact the dealer for the PC Update software or visit the official website: <http://www.cgsulit.com> to download.

## Accessories

Blow Molding Case		Main Unit		Main Cable	
USB Cable		User Manual		Warranty Card
